PERSONAL PROFILE

As an enthusiastic communication design student, I am interested in branding. I am keen to contribute my abilities enthusiastically to a creative and dynamic team. I can produce effective and practical designs because of a firm understanding of design concepts and expertise with design tools like Adobe Creative Suite. I work harmoniously with others, pay attention to details, and constantly seek to improve. My dream job is in a design studio where I can contribute to worthwhile projects and hone my design abilities.
